### **About Canterra Minerals**

Canterra Minerals is a diversified minerals exploration company with a focus on critical minerals (zinc and copper) in central Newfoundland. Canterra’s critical metals projects include four deposits which host compliant resources with considerable exploration potential. The deposits are located in close proximity to Teck Resources past producing Duck Pond mine and the past producing Buchans Mine. The deposits host a combined compliant resource of 4.1 million tonnes of Indicated Resources and 1.2 million tonnes of Inferred Resources. Please see the NI 43-101 Technical Report “Lemarchant and South Tally Project, Technical Report and Updated Mineral Resource Estimate” effective September 20, 2018. In addition, Canterra holds exploration stage gold properties that cover 80 km of strike length of the regional gold bearing Rogerson Lake structural corridor which hosts Marathon Gold Corporation’s feasibility stage Valentine Lake Gold Project. The gold projects have been subject to four drilling campaigns, demonstrating many gold occurrences and warranting further exploration.
